Profile

Ambitious Full-Stack development student at University College PXL. Interested in everything computer related: from building computers over creating websites to figuring out what everything does is what made me want to go into the field of IT. As a fan of travel I'm always looking forward to travel as far as possible. I love meeting new people and discovering all about different cultures. Next on the bucket-list: Japan.

I am hoping to combine my love for IT, travel and cars (especially Formula1) when finding a job.
